Rave Guardian App

Download the above app icon on the Apple App Store for iPhones and Google Play for Android devices.

What is RAVE Guardian?

Rave Guardian is a mobile app that turns any cell phone into a personalized protection network. It connects you directly with the University of Redlands Public Safety department.

Create a detailed caller profile

Students, faculty, and staff can set up complete profiles in RAVE Guardian. By providing information about any medical conditions, your course schedule, addresses, campus ID photo and other critical data, it is easier for Public Safety to find and help you in case of an emergency. Make sure you use your Redlands.edu email address and password when registering.

Set Safety Networks & Timers

The app lets you set safety timers notifying Public Safety of your location. Simply set the timer before you leave your building or vehicle, inputting information about your destination and/or route AND the approximate amount of time you think it will take you to get there. When you arrive, deactivate the timer. If you do not deactivate it in time, the app will prompt you to do so. If it is not deactivated, Public Safety dispatchers will be notified and will attempt to locate you. If they cannot, an officer will be dispatched to check on you.

Notify Public Safety of Crime Tips

You can send crime tips and pictures using the app. Dispatchers will assess the information and an officer will be sent.

Request Unlocks

Locked yourself out of your building? Advise your location, including the room number, and whether you are inside or outside the building.

As always, if you "See something, say something." Call Public Safety at (909) 748-8888.
