

Medical Care

24/7, **On-Demand and Scheduled Support** for Physical Health

TimelyCare's medical services can treat **120+ health conditions**.

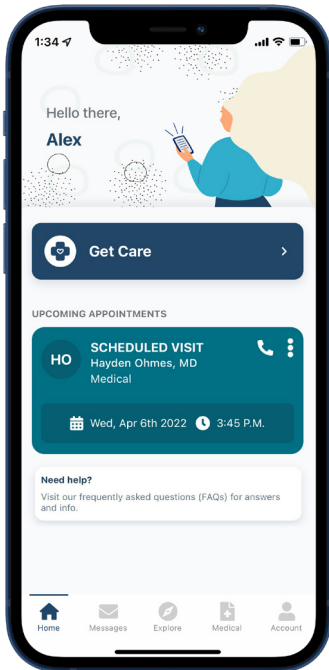

With TimelyMD's medical services, students gain access to 24/7, on-demand, and scheduled medical visits to help avoid costly medical bills from emergency rooms and urgent care facilities.

Using evidence-based, clinical care guidelines, our healthcare providers can treat a wide range of medical conditions, from cold and flu to women's health and dermatology. And we're committed to prescribing antibiotics only when needed.

We also understand cultural diversity in providers is a critical element of equity and access to care. That's why providers are selected to reflect the student populations we serve and trained to be culturally competent.

Virtual Care Helps Students Avoid Costly Medical Bills

With over 120 medical conditions treated by TimelyCare's medical care, our providers can support students with a variety of low-acuity issues. This offers more opportunities for high-acuity patients to be seen by on-campus providers, while also helping decrease students' after hours visits to emergency rooms or urgent care facilities that can result in costly medical bills.

And the Pharmacy Geo-Locator built into the TimelyCare platform enables students to get the prescriptions they need from the pharmacy closest to them.

How Medical Care Supports Campus:

Unlimited 24/7, on-demand, and scheduled medical visits with licensed healthcare providers

Scheduled virtual medical visits allow students to choose a provider and preferred appointment time

Patient records can be securely shared back to the campus clinic for continuity of care

Providers can write prescriptions, except for controlled substances, and a prescription discount card is available to students

Institution care protocols are used when in-person referrals are needed for additional care, labs, or testing
